PLANT MATERIALS

COMMON NAME	SCIENTIFIC NAME	SIZE	AREA 446 sf
RED ALDER	ALNUS RUBRA	1 GAL	2
TOTAL TREES			
RED-OSIER DOGWOOD	CORNUS STOLONIFERA	1 GAL	6
SALMONBERRY	RUBUS SPECTABILIS	1 GAL	6
SLOUGH SEDGE	CAREX OBNUPTA	1 GAL	24
TOTAL SHRUBS & GROUNDCOVERS			36

GRASS SEEDING

GRASS NAME	SCIENTIFIC NAME	PERCENTAGE
BLUE WILDRYE	ELYMUS GLAUCUS	60%
MEADOW BARLEY	HORDEUM BRACHYANTHERUM	30%
TUFTED HAIRGRASS	DESCHAMPSIA CAESPITOSA	10%

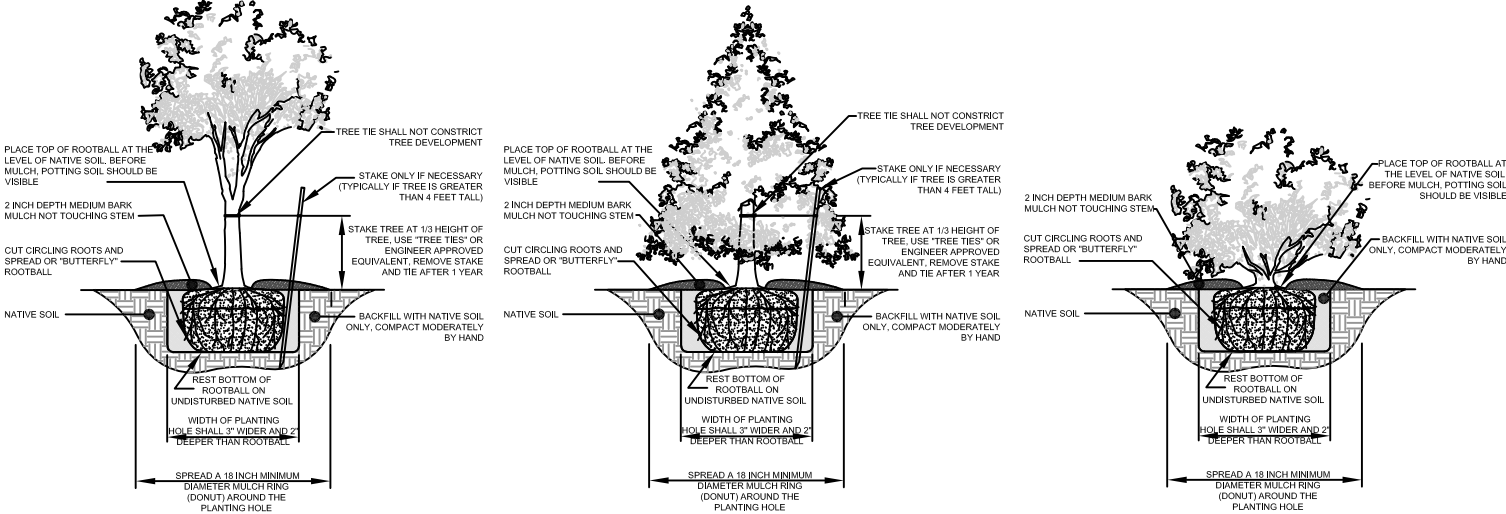

- \* APPLICATION RATE: 15 LBS PER ACRE
- \* TOTAL BUFFER AREA TO BE SEEDED: 446 SF
- \* TOTAL AMOUNT OF SEED NEEDED: 0.15 LBS
- \* BROADCAST SEED APPLICATION BY HAND

NOTES: INSTALL SILT FENCE ALONG THE OHWM OF FIVEMILE LAKE

- NOTES:
1. INSTALL SILT FENCE ALONG OHWM
2. REMOVE ALL ENGLISH IVY & REED CANARYGRASS
3. RETAIN EXISTING NATIVE TREES AND SHRUBS
4. REMOVE ENGLISH IVY FROM EXISTING TREES
5. PLANTS TO BE RANDOMLY LOCATED ON TRIANGULAR SPACING
6. TREES 10' O.C. AVERAGE SPACING
7. SHRUBS ARE 6' O.C. AVERAGE SPACING
8. INSTALL SLOUGH SEDGE IN ROW ALONG OHWM, 2" O.C.

**A. General Information/Background**  
The applicant has applied for a dock on Fivemile Lake, SHOR23-0023.

**Environmental Consultant**  
J. S. Jones and Associates, Inc.  
Attn: Jeffery S. Jones, Wetland Scientist  
PO Box 1908  
Issaquah, Washington 98027  
253-905-5736

**B. Summary of Existing Conditions**  
The mitigation area is heavily dominated by invasive plants. A few plants were installed in the area for the buffer enhancement that was required for the residence.

**C. Impact Analysis**  
The proposed dock impact is 264 square feet . The proposed mitigation is 446 square feed of restoration 10 feet wide along the shoreline. The proposed mitigation is at a 1:1.7 ratio.

- D. Implementation**  
The goals and objectives of restoration are:
- 1) Remove invasive plants
  - 2) Install plant materials
  - 3) Maintenance throughout the monitoring period
  - 4) Annual monitoring three growing season after installation
  - 5) Contingency measures if performance standards are not met

**E. Performance Standards**  
The performance standards are as follows:.

Performance Standards	Year 1	Year 2	Year 3
Shrub/Sapling Tree Cover	5%	10%	20%
Shrub/Sapling Tree Survival	100%	90%	80%
Groundcover Cover	10%	15%	20%
Groundcover Survival	100%	90%	80%
Invasive Plan Cover	<10%	<10%	<10%

Performance standards include retained and volunteer native plants.

Potapchuk Dock Mitigation Plan

**F. Maintenance**  
Inspect plants for survival, damage, and weeds at least monthly during monitoring period. Removal all weeds from planting areas. Weedeat grass being careful not to damage install plants. Replace all dead plants Year 1 and for plant survival of at least 80% Years 2 and 3.

**G. As-Built & Monitoring**  
Monitoring shall be conducted annually for 3 years.As-built plans to be provided at completion of implementation. A minimum of three photo points will be established in each mitigation and restoration area. Year 1 monitoring count every plant and estimate plant cover for the entire mitigation area. A photo of the mitigation will be taken. The as-built drawing will show the location of all transect and plots and provide baseline data. All monitoring reports will be sent to King County DPER within 60 days of completion of monitoring data collection and by November 30th each year. The monitoring report shall provide plant counts, cover estimate, photos, and discussion of results. Reports will provide information on maintenance activities and use of contingency measures such as plant replacement. If monitoring reveals the project does not meet performance standards than a contingency plan will be provided to King County DPER. Monitoring may be extended until Year 3 performance standards are met.

**H. Bond/Financial Guarantee**  
Prior to beginning any work, the Permittee must provide a mitigation/restoration bond or assignment of funds per King County procedures. Upon approval of the mitigation plan, a bond quantity worksheet will completed based on all elements of the mitigation/restoration plan.

**I. As-built Reports**  
An as-built and baseline monitoring report will be provided to King County DPER within 30 days of the completion of installation of this plan.
