- Notes:
- 1. The Duwamish river is critical habitat for Puget Sound Chinook salmon, Puget Sound steelhead, and Coastal-Puget Sound bull trout. The Duwamish river is essential fish habitat for groundfish and pacific salmon (Chinook, Pink, and Coho).
 - 2. The Ordinary High Water Mark (OHWM) is estimated to be coincident with the High Tide Line. It has not been field verified.

Removal Volume	Removal Area
39,650 Cubic Yards Dredged	19,8645 SQ. FT. Dredged
1,066 Cubic Yards of Sand Cover to 1 FT in DMMU 12	28,786 SQ. FT. Cover Material
