Subject: **PROJECT NARRATIVE
PROPOSED BULKHEAD REPAIR
20518 CHAUTAUQUA BEACH RD SW
VASHON, WASHINGTON**

Ref: King County Template Plan Sheets 1 & 2, GEO Group Northwest stamped: 11-13-24.

Dear Mr. Naumann:

To aid in your application for a Shoreline Exemption and Clearing and Grading permit we have prepared the following Project Narrative which describes the proposed project at the subject site.

PROJECT NARRATIVE

For the proposed bulkhead repair project as illustrated on the referenced plan sheets, the scope of development includes: remove and replace existing horizontal timbers/lagging at the existing bulkhead where they have deteriorated (rotten) or washed away, install filter fabric at washout areas, place imported fill at washout areas and construct new foundations where existing bluff stair/deck has been undermined due to the washouts. Implement temporary erosion and sedimentation controls as noted on the plan and restore/mitigate permanent erosion risks by installing jute netting at disturbed slope areas and planting native drought tolerant vegetation.

If you have any questions, or if we may be of further service, please do not hesitate to contact us.

Sincerely,
GEO GROUP NORTHWEST, INC.

Adam Gaston
Project Engineer
