JUROR EXPLANATION FORM

If desired, you may provide a written explanation of any of your answers to the interrogatories. You need only provide a written explanation when you believe that a written explanation of your answer would provide information helpful in explaining or interpreting your answer.

<p>Interrogatory No. <u>22</u>:</p>	<p>conflicting testimony about whether not some reports that officers gave commands at the same time ourlapping + other reports that they gave commands one at a time. And some testimony cannot recall what exact commands were given.</p>
<p>Interrogatory No. <u>77</u>:</p>	<p>I do believe that on a more probable basis the officers followed the law + impartial policing. I do personally wonder how much implicit bias may have guided some interaction with Mr. Williams. For instance, perceiving that he didn't care or pay attention. And automatically perceiving the gun as a threat. <small>while it was reasonable in the situation.</small></p>
<p>Interrogatory No. <u>79</u>: 80</p>	<p>I don't believe federal way police dept. had appropriate policies regarding deescalation in 2019. There was little to do policy in the handbook specifically on the topic and we did not receive details about training curriculum. Additionally the chief deputy defined deescalation as "the process to achieve voluntary compliance" in order to reduce or use least force. However, officers followed what mandated.</p>
<p>Interrogatory No. <u>85</u>: 79</p>	<p>From an outside perspective the 2019 deescalation training seems limited. Additionally "deescalation" tactics may not align w/ laymen understanding E.g. large police force, drawing weapons, taking cover, giving commands in a loud/yelling tone, etc are trained as deescalation tactics. <small>regardless police followed training.</small></p>
<p>Interrogatory No. <u>88</u>: 40</p>	<p>Based on testimony and evidence presented I don't don't believe there was enough to prove concretely know how many were shot. Not all fragments were tested as they were lost. There is not enough based on location of casings + wound, bullet defects, etc to confirm which bullets were all shot by which gun or exact trajectory/direction.</p>

<p>Interrogatory No. <u>15</u>:</p>	<p>Several officers reported they stopped shooting because they were out of bullets ^{or had to reload} or lost visual of Mr. Williams. Additionally, officers reported that they did not get closer to observe Mr. Williams because they were concerned concerned that he could still be a threat to safety and they were <u>unsure if he was subdued. <p>Interrogatory No. ¹⁶ <u>16</u>:</p>	<p>Based on various factors there was no determination about exact trajectory or which bullet defects and shots that hit Mr. Williams were caused by which gun. All officers reported shooting @ Mr. Williams location/direction forensic / on ballistic analysis could not concretely determine which gun/officers shot the bullets found in Mr. W.</p>

<p>Interrogatory No. <u>82</u>:</p>	<p>I do not believe firing the taser in this situation complies with training as there testimony and policy that force should be reasonably expected to overcome obstacle/compliance, and and a taser is not a deadly force. It would not be within policy to use if officers felt there was an imminent threat of gun fire. It is reasonable +</p>
